MONACT

SOUND ENGINEERING

BEFORE YOU START

Hi, I'm **Moaiact**.

I'm a sound engineer and producer, and Moai Glitch came from something pretty simple: I wanted to chop, repeat and flip audio in time with the track without spending hours editing by hand.

I used it on my own tracks first, kept polishing it, and now I'm handing it over to you. The idea is simple: drop it on any track (a vocal, a drum loop, a synth, a whole bus) and in two minutes you've got cuts and stutters that follow your project's tempo.

You don't need to read all of this to use it. If you like to try things first, jump straight to the quick start page. If you want to get the most out of it, here I explain what every knob does and share a few recipes that work for me.

If you find anything weird or come up with an idea, let me know. This plugin is going to keep growing.

MOAIACT

SOUND ENGINEER · PRODUCER

What it does, in one sentence

It records a slice of the incoming audio, as long as you choose (1/4, 1/16, a triplet...), and repeats it as many times as you tell it to, synced to your DAW's tempo. On top of that you can add random reverse, flanger, random panning and a reverb that comes and goes.

QUICK START

Your first glitch in **30 seconds**.

1. **Load it as an insert** on the track you want to chop. Vocals, drums or a full bus — it doesn't care.
2. **Hit Play.** Moai Glitch follows your DAW's tempo and position, so the cuts always land on the grid.
3. **Pick the slice length in RATE**: 1/16 for the classic fast stutter, 1/4 for more musical repeats.
4. **Turn up REPEATS** so each slice repeats more times before a new one is recorded.
5. **Add some flavor** with Reverse, Pan FX and Reverb. To blend it with the original signal, lower DRY/WET.

> Tip: double-click any knob to reset it to its default value. You can also resize the window from the bottom-right corner.

Zero latency

Moai Glitch adds no latency: use it live, while recording or on the master without anything drifting out of time.

TOUR

The **interface**

Everything sits in two panels: the glitch engine on top, effects and output below. The colors tell you which group each knob belongs to. They never change with the value: the arc grows and, as it nears the maximum, the knob lights up.

1. **Rate** · slice length
2. **Repeats** · how many times it plays
3. **Reverse** · reverse probability
4. **Flanger** · metallic sweep
5. **Pan FX** · random panning
6. **Reverb** · reverb amount
7. **Verb Prob** · when the reverb kicks in
8. **Dry/Wet** · blend with the original

> Green = glitch engine · Blue = effects · Purple = reverb probability · White = output.

GLITCH PANEL

The **engine**

1 · RATE

Sets the length of each slice in musical note values. Use the arrows on the display or the mouse wheel to step through them, or click the center to open the full list.

D means dotted (longer) and **T** means triplet.

`1/1` `1/2` `1/2D` `1/4` `1/8` `1/16` `1/32` `1/64` `1/4D` `1/8D` `1/4T` `1/8T`

2 · REPEATS

How many times each slice plays. The first pass is the live audio (recorded as it plays) and the rest are the repeats. At 1 the audio passes through clean; at 16 you get a long loop of the same little piece.

`1 – 16` `default: 4`

3 · REVERSE

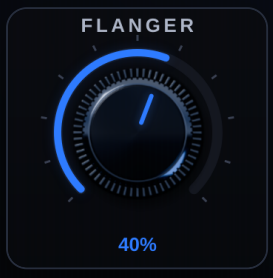

The chance that each repeat plays backwards. At 0% never, at 100% always, and anywhere in between it's a different surprise every bar. Every change uses a short crossfade, so there are no clicks.

`0 – 100%` `default: 0%`

FX / OUTPUT PANEL

The **effects**

All effects only touch the glitched part. The original signal is left alone.

4 · FLANGER

A metallic sweep that breathes with the groove: one full cycle every two bars. Low settings add movement; high settings sound like a jet.

`0 – 100%`

5 · PAN FX

Random panning: each repeat lands left or right at random, always in time. The higher the knob, the further it jumps; at 100% it goes almost hard left or right. At 0% everything stays in the center.

`0 – 100%` `default: 0%`

6 · REVERB

How much reverb is added to the glitch. The tail never cuts off abruptly: it fades out on its own.

`0 – 100%`

7 · VERB PROB

The chance that a repeat is sent to the reverb. At 100% every repeat gets reverb; lower values hit only some of them, so the space appears and disappears at random.

`0 – 100%` `default: 100%`

8 · DRY/WET

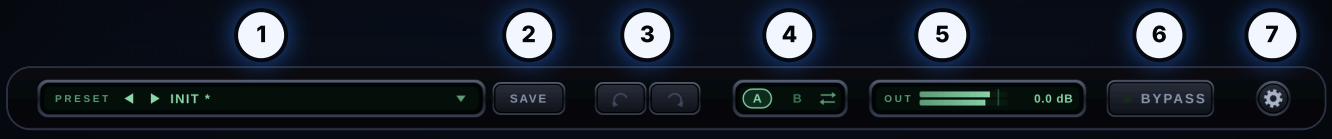

Blend between the original and the processed audio. At 100% you only hear the glitch; lower it for parallel processing.

`0 – 100%` `default: 100%`

NEW IN VERSION 1.1

Presets and **settings**

A new bar on top of the plugin has everything you need to work fast: presets, comparing two sounds, undo and output control. The rest of the interface stays exactly the same.

1. **Preset** · ◀ ▶ step through the list and the name opens the menu. A * means you changed it.
2. **Save** · saves your sound as a user preset. Using the same name replaces it.
3. **Undo / Redo** · undoes or redoes the last change (preset changes too).
4. **A | B** · two settings to compare. ⇄ copies the active one to the other. Saved with the project.
5. **Out** · output meter. Drag up or down to trim from −12 to +6 dB. Double-click: 0 dB.
6. **Bypass** · hear the original signal, without clicks. It is the same bypass your DAW uses.
7. ⚙ **Settings** · window size, help boxes, help language, Reset and About.

Settings

Interface size changes the window size (75 – 150 %) and remembers it for next time. **Tooltips** shows help boxes when you hover over a control, in **English or Spanish** depending on **Help language**. The interface always stays in English. **Reset to defaults** sets everything back to Init and **About** shows the version and credits.

Knob shortcuts

Shift + drag · fine adjustment
Double-click · default value
Right-click · type an exact value
Mouse wheel · also moves the knob

> Your presets are stored in `Documents\Moaiact\Moai Glitch\Presets`. You can copy them to another computer or share them. The factory presets also show up in your DAW's program menu.

GET INSPIRED

Moaiact recipes

All of these recipes come included as **factory presets**: load them from the PRESET menu, then tweak to taste.

CLASSIC VOCAL CHOP

PRESET · CLASSIC VOCAL CHOP

Chop a vocal in the drop without losing the lyrics.

`Rate 1/8` `Repeats 4` `Reverse 15%` `Reverb 20%` `Verb Prob 50%` `Pan FX 20%`

DRUM FILL

PRESET · DRUM FILL

Automate Dry/Wet at the end of bar 4 or 8.

`Rate 1/16` `Repeats 8` `Flanger 10%` `Pan FX 15%`

SPATIAL TAPE STOP

PRESET · SPATIAL TAPE STOP

Long repeats that move around the stereo field.

`Rate 1/4` `Repeats 3` `Reverse 50%` `Flanger 35%` `Reverb 35%` `Pan FX 70%`

BROKEN ATMOSPHERE

PRESET · BROKEN ATMOSPHERE

For pads and textures: the reverb shows up every now and then.

`Rate 1/2D` `Repeats 6` `Reverse 60%` `Reverb 70%` `Pan FX 60%` `Dry/Wet 80%`

PARALLEL GLITCH

PRESET · PARALLEL GLITCH

Keeps the original groove with glitchy sparkle on top.

`Rate 1/16` `Repeats 6` `Reverse 30%` `Pan FX 40%` `Dry/Wet 45%`

FULL REVERSE

PRESET · FULL REVERSE

Every repeat backwards — great for transitions.

`Rate 1/4` `Repeats 4` `Reverse 100%` `Reverb 25%`

> Automating **Dry/Wet** or **Repeats** in your DAW is the quickest way to bring the glitch in and out exactly where you want it.

INSTALLATION

Get it **running**

1. **Windows:** unzip the file and copy the `Moai Glitch.vst3` folder to `C:\Program Files\Common Files\VST3`.
2. **Mac:** open `Moai Glitch 1.1.0 (macOS).pkg`. If macOS blocks it, go to **System Settings → Privacy & Security** and click **Open Anyway**. It installs VST3 and AU (Logic Pro).
3. Open your DAW and rescan your plugins. You'll find it as **Moai Glitch**, by **Moaiact**. Your presets are saved in `Documents/Moaiact/Moai Glitch/Presets`.

Specifications

Version	1.1.0
Presets	12 factory + your own · A/B · Undo / Redo
Output	Click-free bypass · Trim −12 to +6 dB · meter
Format	VST3 (Windows) · VST3 + AU (macOS)
System	Windows 10 / 11 64-bit · macOS 11+ (Apple Silicon & Intel)
Channels	Stereo
Latency	0 samples
Sync	DAW tempo and position (120 BPM without a host)
Divisions	12: straight, dotted and triplet
Window	Resizable, 560 – 1260 px wide
Manufacturer	Moaiact

THANKS FOR USING MOAI GLITCH

Made with love, a lot of coffee and way too many hours of stutter. If you use it on a track, I'd love to hear it.

MOAIACT
